

TAG Aviation Maintenance Services

No compromises

TAG Aviation Europe has a reputation built upon over 40 years of uncompromising standards for **service, security and operational excellence**. Optimum maintenance is essential to the safety, reliability, and value that define our standards.

We have mastered every aspect of **support, engineering and maintenance** services for business aviation. Our approach enables us to offer unique services tailored to highly individual needs.

Client confidence in TAG Aviation has made us a **leader** in aircraft maintenance in Europe. We help you **optimize** your schedule, your aircraft and your life to make the most of every asset, every trip, every minute.

This is what makes us TAG Aviation.

Maintenance experience

Maintenance performance is the **cornerstone** of TAG Aviation technical services. Optimizing flight productivity requires maintenance **depth and flexibility**, including around-the-clock capabilities.

As one of the world's **largest operators of business jets**, TAG Aviation understands what it takes to keep your aircraft flying and has the flexibility to meet the scheduling requirements of the clients.

Our support, engineering and maintenance processes are based on TAG's experience **operating its own jet aircraft**. Our technicians are factory trained and highly experienced on a variety of business jet aircraft. Our commitment to quality and service delivers improved aircraft reliability, availability, and lower costs for each customer.

We return aircraft to service on schedule, on budget and **dispatch-ready** to keep them out of the hangar and in the air.
