

Required Navigation Performance 4, 5&10 (RNP) **(2Hrs)**

These courses are designed to inform pilots of the new area navigation system which is already in place in many areas. The course offers a detailed examination of the system, and ensures that pilots are ready for the forthcoming requirements for area navigation.

These courses are all led by experienced pilots and provide up to date information related to current requirements. The course aims to provide a thorough understanding of RVSM, MNPS, RNP and P-RNAV.

- R.N.P. Areas
- R.N.P. RNAV General
- E.C.A.C. European Civil Aviation Conference Airspace
- Contingency Procedures
